Re: Air Quality Testing
School Campus, Community Integration Center, Vista Early Intervention, Vista Camp Hill

To Whom It May Concern:

Vista Autism Services retained EHC Associates, Inc. (EHC) to perform an air quality investigation and sampling at the school campus, Community Integration Center, Vista Camp Hill and Vista Early Intervention. The investigation and sampling was performed to provide The Vista School and other Vista entities with continued annual air monitoring of its schools and buildings.

The investigation and sampling was performed throughout the Elementary School, Middle School, Junior High, and High School along with the Community Integration Center, Vista Camp Hill and Vista Early Intervention. The sampling was completed on June 26 & 27, 2023.

Air samples were collected using a bio-aerosol sampling pump; samples were collected from random classrooms, offices, and common spaces throughout the campus, Community Integration Center, Vista Camp Hill and Vista Early Intervention.

Samples were shipped under chain-of-custody procedures to Hayes Microbial Consulting – AIHA Accredited 188863 – for analysis of non-viable fungal spore count and genus ID.

Laboratory analysis confirms, at the time of sampling, that mold spore counts are currently within acceptable ranges (indoor compared to outdoor). Further sampling will be performed on an annual basis, or as needed if a water intrusion issue occurs.

Should you have any questions related to this sampling event and investigation, please contact Vista Autism Services.

Sincerely,

Mark Andrechik
Project Manager
